Subject: RE: EHCJLI/01/02 storage samples

Sensitivity: Confidential

Dear Megan,
I fully understand the space limitations, but as long as I have not seen any data from the study I think it would be a mistake to discard any samples.
Best regards
Hans

Sensitivity: Confidential

Hans,

We would like to know if it is acceptable to discard storage samples for MDSPS #28030 Philip Morris # EHCJLI/01/02. Our freezers are quite packed and the extra space is much needed.

Further, a subject on the EHCJLI/02/02 make up group (they randomize on 07 Sep 2002) has just informed us that his mother has died and that he needs to miss next weekend. Is this acceptable, or does he need to be removed from the study?

Please advise,
Megan
